CXT

Delivering L.B. Foster innovation

Precast Concrete Utility/Multipurpose Buildings

Pump & Utility | Guard House & Office | Telecommunications | Electrical | Storage

CXT® buildings can protect your valuable equipment and provide a viable solution for remote sites. A variety of doors, ventilation choices, and security options are available to offer a solution that works.

- 4" thick steel-reinforced concrete walls
- 5" thick steel-reinforced concrete roof and floor
- Vandal-resistant components
- Can withstand extreme conditions caused by flood, snow, wind, and zone-4 seismic loads
- Will not rot or burn
- UL752 bullet resistant rating
- Available in a variety of colors and textures

Pump and Utility Buildings

Along with our standard buildings, we also manufacture an "open floor" structure that allows the utility to be in place on a foundation; then the building is set over the top.

Electrical and Telecommunications Buildings

A secure, vandal-resistant building that will protect your valuable electric or communication terminals.

Containment Buildings

Our containment buildings arrive on site with monolithic floor sumps to assure that no material escapes the confines of the building, and coated sumps for additional containment. The quality materials and procedures create a building that not only keeps the material from escaping but prevents outside forces from entering. Fusible link vents, post tensioned floor and roof, and oversized 4' doors are just a few of the features designed to offer a better building for containment.

Other Available Options

- Blow out panels
- Smoke detectors
- Various exterior finishes

Storage Buildings

Delivered to your site ready to use with minimal site preparation. Also, no kits, cement blocks or tilt-up panels required that increase installation time.

Colors and Optional Textures

The color samples shown are approximations only. Other textures and specific colors available upon request.

Block

Stucco

Standard sizes:

- 10' W x 10' L x 8' 10" H
- 10' W x 12' L x 8' 10" H
- 11' 6" W x 16' 6" L x 8' 10" H
- 11' 6" W x 20' 6" L x 8' 10" H

Our precast concrete buildings can be adapted to meet your site specific requirements. A variety of doors, ventilation options, and security add to the ability to create a precast concrete building solution that works. CXT buildings are manufactured according to the high quality standards of PCI and the NPCA.

Available Options

- Variety of door sizes and types
- Electrical packages
- Insulation packages
- HVAC/ventilation systems
- Various exterior finishes
